Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Thursday 24 Jun 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Becoming drier and brighter after a damp start.

Today:
A damp and cloudy start with some rain soon clearing to the south. Becoming drier and brighter with some warm sunny spells by around midday, though cloud thickening again through the afternoon. Maximum temperature 22 deg C (72 deg F).

Tonight:
Cloud becoming widespread before outbreaks of rain across the region occur through the rest of the night. Becoming quite breezy for some. Minimum temperature 8 deg C (46 deg F).

Friday:
A rather cloudy day with a mixture of rain and showers at times. A few brighter spells at times too. Becoming rather breezy for some and feeling rather cool too. Maximum temperature 19 deg C (66 deg F).

Outlook for Saturday to Monday:
Another cloudy, damp, and cool day on Saturday, but with some clearer and brighter spells later. Largely clear and dry on Sunday and Monday, feeling warmer too.
